INTRODUCTION

I'm a college student pursuing a B.Tech in Computer Science. As a passionate frontend developer, I actively apply my skills to create modern web applications. Eager to broaden my skill set, I am actively exploring cloud computing technologies, particularly within the AWS ecosystem. My goal is to become a proficient MERN Stack Developer while delving into data analytics and cloud services to complement my web development expertise.With hands-on experience in frontend development , I bring a deep understanding of web development technologies and also practice my DSA skills to enhance my problem-solving abilities.

SKILLS

Languages: Javascript, C++, Node Js (Currently Learning) ,Typescript HTML5 , CSS
Frameworks: ReactJs , Tailwind , Express Js (Currently Learning)
Libraries: Framer motion, React three fiber (Beginner), MUI
Tools: Figma,Canva, Power BI (Familiarity)
Database: MongoDb (Currently learning)
Soft skills - Continuous Learning, Teamwork and Collaboration

PROFESSIONAL EXPERIENCE

Triazine software pvt ltd - Frontend developer intern   May'23 - Aug'23

- Developed user module with React, including authentication and registration flows managed by Axios API calls.
- Implemented interactive landing page in React, fetching data from API using Axios for content display.
- Built robust form validation with custom error handling, integrating OTP verification.
- Developed interfaces of multiple projects as assigned to me using HTML5 and CSS.
- Accumulated industrial experience by working on a live project where I enhanced UX and data retrieval by collaborating with backend engineers on a land rental website (Patched)

Online Frontend developer internship at CollCom   April'23 - June'23

- Worked with a NGO to develop a user-friendly, responsive website for their Cybersecurity awareness campaign.
- Implemented form validation techniques.
- Created multiple pages to provide comprehensive information.
- Applied design principles for optimal user experience.

PROJECTS

Patched - dev.patched.tech *(demo)*   *June'23 - August'23*

- Contributed in the development of a dynamic land rental website using React.js, JavaScript, Material UI, Axios API, and CSS.

IP Address -Tracker - https://ipaddtracker.vercel.app/   *August'23*

- Using ReactJs, Leaflet Js, Geolocation API

Digital Adhivakta - https://youtu.be/ksM58tGsaIw?si=vcphKefEgu_Zfgp1   *August'23 - Present*

- Designed an Incentive-Driven Strategy to attract Legal Service Providers to an E-Marketplace, Expanding Access to Legal Services for Indian Citizens.

Social media analysis tool - https://innergram.vercel.app/   *October'23 - Present*

- Developing a privacy-compliant Instagram social media analysis tool utilizing DSA algorithms with multiple features for comprehensive data insights.

CollCom NGO   *April'23 - June'23*

- Worked with a NGO to develop a form filling-website for their Cybersecurity awareness campaign.

EDUCATION

Bennett University, Times of India Group, BTech CSE   *(2021-2025)* CGPA: 9.3
Modern Vidya Niketan, Faridabad   12th Percentage: 90% , 10th Percentage: 94.6%

ACHIEVEMENTS/CERTIFICATIONS

- Top 5% highest performers • 3rd position in Smart India Hackathon, college level • AWS Foundation Level course
- HTML, CSS, and Javascript for Web Developers- Coursera • Frontend development - FreeCodeCamp
